## MORE INFO ON THE ARTISTS

**Yuniel Delgado** - One of Cuba's most upcoming artists he has exhibited in both New York and Miami previously. His style combines dark backgrounds with colorful abstract figures.

**Serlian Barreto** - The youngest artist in the collection, he has won national and international prizes for his work since graduating from art school. His work focuses on natural landscapes and animals. Most notably cactuses.

**Osy Milan** - An established artist in Cuba, she has exhibited in several galleries across the US, Cuba and Europe. Her work has pop art-style tones and commonly features different types of birds as a symbol of journeys, covering a distance, and freely moving from one place to another. Something that is prohibited in Cuba.

**Jose Capaz** - Another upcoming star in Cuba's art scene, his style varies from series to series. Works often contain large tongues in various settings. The piece on exhibition displays huge life like tongues in Cuba's national flower.

**Dayron Gallardo** - The most established out of all of the artists on display, his work features fragmented landscapes imagined to be from other dimensions. A frequent exhibitor in Cuba his work belongs to many private collections across the globe.
